

## Vegan Valley: Plot M

This riverside plot has an exciting tucked away gully with a magical bank big enough to camp on in Summer (although some bramble hacking may be required to reclaim the space!) With babbling brooks on two sides and sweeping pastures ripe for edible food forests, this quiet sanctuary space is ideal for edible forest gardens, rewilding to increase biodiversity and creating wild flower meadows to encourage pollinators. Backing onto 100s of acres of common land forest, this is a nature lovers treat! Pet free and adults only.

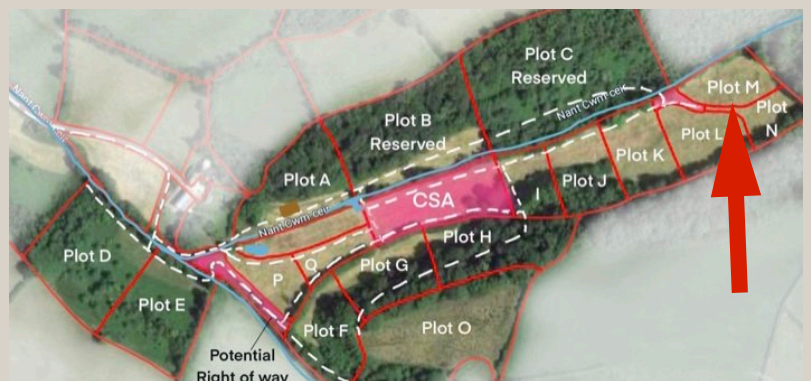

For those that wish to plant trees, we can assist with grants to get free trees through our non-profit organisation Edenkind, but as there are sunny flood zone areas ideal for seasonal crops, we are open to rural enterprise ideas that add to our agroecological vision.

By joining our growing edible forest permaculture farm, buyers can enjoy the permitted development of adding agricultural buildings and seasonal workers accommodation, but you need to have a rural enterprise of course!

With babbling brooks running on two sides of this plot, it is likely to be the first to be reserved! £20,000 FREEHOLD to include membership/co-ownership of central permaculture farm, poly-tunnel, plunge pools, camping & campfire area and even a silver birch forest!
