

Vegan Valley: Plots I, J, K, L

These plots are the blank canvases of the valley as they are mostly made up of wild flower meadows and only a scattering of newly planted edible forest saplings so far! Plots I and J have the advantage of mature garden planting with sumac trees, rhododendron, dogwoods and roses. With tucked away seclusion in the heart of the valley and shared riverside access, this part of the valley really is the jewel in the crown. Roughly 1 acre plots £20,000 to include membership/co-ownership of the central permaculture farm, plunge pools, camping with campfire area and silver birch wood.

Pet free, child free and the quietest part of the valley, these plots enjoy year round sun even in the depths of winter. With the option to buy multiple plots it's possible to own the entire far end and hide away from the world completely in this nature haven ripe for planting and increasing biodiversity!

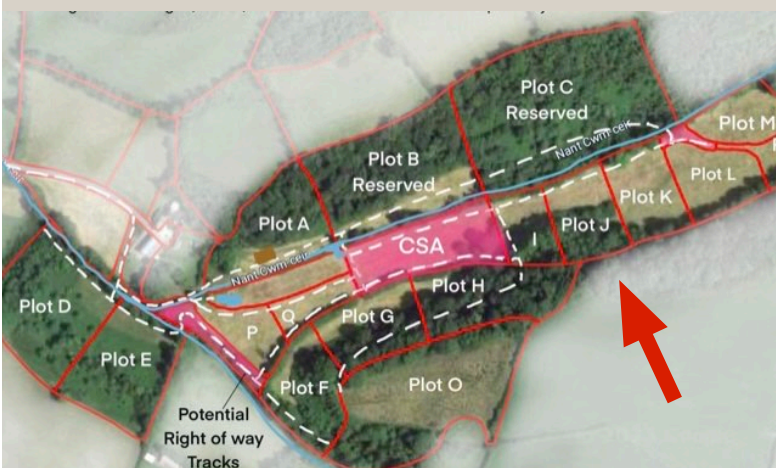

Backing onto Brechfa forest with riverside access to the spring fed Nant Ceir, off-grid self sufficiency is entirely possible here. With grazing rights in the 100s of acres of adjoining forest, this may also suit someone with rescue animals that would love to roam through common land forest.

Discounts to buy multiple plots!

For those wishing to plant trees, we can assist with obtaining free trees through our non-profit organisation and have funds to sponsor rural enterprises such as mushroom growing and orchard planting.

Being part of the larger agroecological edible forest project comes with the benefits of permitted development for seasonal workers accommodation and agricultural buildings.
